Diabetes – a chronic disease

Diabetes affects millions of people nationally and is estimated to afflict over 25,000 people in Broome County alone. (One third of them have not yet been diagnosed.) Approximately 300 deaths are caused by diabetes each year in our community, plus numerous occurrences of related blindness and amputations. Educating patients with diabetes in the management of this chronic disease will help to decrease these risks.

The UHS Diabetes and Endocrinology Center teaches the vital importance of patient responsibility and self-management in order for the person with diabetes to achieve and maintain optimal health.

NATIONAL RECOGNITION

The American Diabetes Association has attested that our Center’s Self-Management Education Program meets ADA’s standards for patient education. In addition, our Certified Diabetes Educators have been nationally credentialed by the American Association of Diabetes Educators and are certified pump trainers.
UHS Diabetes Education Series

For patients diagnosed with pre-diabetes and diabetes and their families, we recommend attending one of our introductory sessions:

- **Meal Planning and Meter Class**
  a basic session for those individuals recently diagnosed (2.5-3 hours)
- **Diabetes Refresher Class**
  for those needing a review of nutrition and meal planning for diabetes refresher (2 hours)

After your introductory session you will attend the UHS Diabetes Education Program. This will provide you with a comprehensive overview of diabetes, its care, treatment and resources for a lifetime of self-care. A meal will be served for the nutrition component. A program is scheduled each month to choose from. (See our class schedule for choices of dates.)

Lastly, you will be scheduled for a follow-up appointment to meet with a Diabetes Educator to review food records, blood sugars, lab values and your progress.

Our three-part instructional program helps educate patients to better understand the nature of diabetes and teach optimal self-care techniques. Slides, videos, games and handouts are utilized throughout the program.

A spouse, significant other and/or family member are invited and encouraged to attend. (There is no charge for a guest.)

### Diabetes Education Program:

#### Part 1: Diabetes Overview
- Type 1 vs. Type 2
- Hemoglobin A1C blood test
- Oral medications vs. insulin
- Target blood sugar, blood pressure and cholesterol ranges
- Smoking cessation
- Support/Healthy coping

#### Part 2: Nutrition Basics
- Carbohydrates, proteins, fats
- Food label reading/Restaurant eating
- Fiber, sugar alcohols, sugar substitutes
- Lifestyle modifications/Being active

#### Part 3: Complication Prevention
- Acute complications (low and high blood sugar) vs. chronic complications (heart disease, eye/kidney disease, nerve damage)
- Sick day management
- Foot care

### Attendance requirements:

To register for the diabetes education series, you will need to:

1. Call to register, (607) 763-6092.
2. Obtain a prescription from your physician or have your physician fax it to the UHS Diabetes and Endocrine Center (763-6677).
3. Schedule your introductory session.
4. At the introductory session you will be scheduled for the Diabetes Education Program.
5. The follow up individual appointment will be scheduled at the Diabetes Education Program.

### Payment

Your introductory session, self-management class, and follow-up appointment will be billed to your insurance company. Please check with your insurance carrier for coverage. Many carriers will pay all, or a percentage, of the fee for classes and/or supplies if prescribed by a physician.

### Individual counseling

Individual counseling is also available for:
- Those who prefer or need individual counseling
- Type 1 Diabetes
- Insulin teaching
- Insulin pump therapy

You must have a physician referral for individual instruction. For information or an appointment, call (607) 763-6092.
