

Advanced Trauma Life Support®

Program Goals

The Advanced Trauma Life Support (ATLS) course provides its participants with a safe and reliable method for the immediate treatment and the basic knowledge necessary to:

- Assess a patient's condition rapidly and accurately.
- Resuscitate and stabilize patients according to priority.
- Determine whether a patient's needs exceed a facility's resources and / or physician's capabilities.
- Arrange appropriately for a patient's interhospital or intrahospital transfer.
- Assure that optimum care is provided and that the level of care does not deteriorate at any point during the evaluation, resuscitation, or transfer process.

Course Faculty

These courses are taught by American College of Surgeons verified Advanced Trauma Life Support® physician instructors.

Fees

Physicians	\$ 800.00
Residents	400.00
Physician Extender (PA & NP).....	400.00

2018 Student Course

Friday & Saturday

December 8 - 9, 2018

07:30 am - 6:00 pm

Advanced Trauma Life Support® (ATLS) provides the essential information and skills that the physician may apply to the identification and treatment of life-threatening or potentially life-threatening injuries.

This two-day course is designed to teach the physician a rapid, systematic method of assessing for life threatening traumatic injuries and prioritized lifesaving management skills in a standardized approach to trauma care in the initial "Golden Hour" following a traumatic event.
